(Admin API, Storefront API, Partner API, Payments Apps API etc...)

💼 EXPERIENCE & WORK HISTORY

Feb 2022 – Oct 2022

iHouse web

Senior Frontend Developer

iHOUSEweb, California, US

I have worked as a Senior Frontend Developer at iHOUSEweb, completing 5 large and small projects.

Roles and Responsibilities:
1) *Deliver engaging user experience through optimization of images, code, and cross-browser compatibility, increasing Time on Page by 60 seconds for websites.*
2) *Designed dynamic and browser compatible pages using HTML5, CSS3, jQuery, JavaScript, TypeScript, React.JS, Next.JS.*
3) *Built single page applications using JavaScript framework such as React, Next and Vue, responsive web design, UI using HTML5 grid layouts, CSS3 media queries where it's an expression and can be used to either true or false.*
4) *Designed and developed in the Redux architecture and Es6 concepts. We followed best practices of react like React Routers, dynamic templates and lazy loading.*
5) *Involved in designing the user experience interface UI/UX strategy, UI requirements, converting findings into UI designs.*

Skills & Experience:
1) *HTML5, CSS3, Tailwind CSS, MUI, React.JS, Next.JS, Vue.JS*
2) *Hands-on experience of optimizing and implementing SEO using Next.js*
3) *Pixel Perfect Figma / XD to React.js*
4) *Extensive experience with AWS, Firebase, API Integration.*

Work History:
1. *Elevate Trips (https://www.elevatetrips.com)*
   - Developed using HTML5, CSS3, Tailwind CSS, TypeScript.
   - Optimized the front-end source code and reduced the loading time.
   - Developed backend API using Node.JS, Express.JS and implemented JWT user authentication.
   - Built frontend using React.JS, Redux Thunk, Next.JS, and Web Vitals.
   - Integrated Airflight and hotel booking third party API.

2. *Luxury Hotel (https://luxuryhotel.com)*
   - Developed using Nuxt.js on the front-end and Node.js on the back-end.
   - Implemented the lazy-loading, Tree Shaking, and purge CSS for being optimized the page loading speed.
   - Improving the user interface with Pixel Perfect and Responsive web design.
   - Used Pinia for managing status data globally and integrated backend APIs the teammates developed.
   - Hosted the website using the CI/CD, AWS.

### 3. Project Development stacks

- Frontend Development
HTML5, CSS3, JavaScript, TypeScript, React.JS, Redux, Redux-Thunk, Next.JS, Vue.JS, Nuxt.js, Material UI, Tailwind CSS, Vuex, Pinia
- Backend Development
Node.JS, Express
- Database
MongoDB, MySQL, PostgreSQL

Company Contract

- Contract Type
  W2 contract, onsite position
- Salary
  Hourly 50$ / 40hrs per 1 week
- Work time
  EST Time zone

Client & Review

Jack Johen (Software Development Team Lead at iHOUSEweb):
"As the senior developer, he has readily fulfilled his responsibilities of developing the online platform within the given timeframe. The final product was very functional, tasteful and aesthetically nice to look at. I already recommended them to other customers and I think that would be that best testimonial and the ultimate recognition."

About the Company

iHOUSEweb, Inc. has been combining real estate experience with cutting-edge technology since 1999. We were one of the first companies to offer customizable websites for REALTORS®, allowing them to create a unique web presence without any technical expertise. Now an industry leader, iHOUSEweb products, IT infrastructure, and customer service are trusted by over 30,000 real estate professionals nationwide.

About the Company

*Catchafire was founded in 2010 with the goal of driving positive world change through the giving of time and talent, for the benefit of the nonprofit community we serve.
We are a community of individuals seeking to support and strengthen the social good sector. We do this by facilitating connections between professionals who want to donate their time and talent through virtual volunteering with nonprofits who need their skills.*
